Action, Inc. Energy Services

47 Washington St., Gloucester, MA 01930
(978) 283-2131 ▪ actioninc.org/energy.html

Why We Should Conserve:

The 2009 International Energy Outlook projects that the world's energy consumption will increase by 44% from 2006 to 2030.

Fossil fuel supplies are limited Earth resources and cause pollution. If we continue to deplete these supplies, what will the future hold for future generations?

Alternative energy helps us rely less on foreign energy resources.

Power outages increase when we overburden our energy supplies.

We offer **FREE** programs that can help you save money and stay warm – while conserving Earth's precious resources.

Energy Services Provided By Action:

- **Fuel Assistance:** Receive help with paying your heating bills during those cold winter months. Program is available from November 1st through April 30th. Discounts on your electric, gas and phone bills may also be applied.
 - **Weatherization:** Stay warm in the winter and cool in the summer! This program can help protect your home against the elements. May include insulation, weather stripping, window repair and replacement, and more.
 - **Appliance Management:** We'll help you cut down on your electric bill by providing energy-efficient light bulbs and helpful tips. We may even replace your refrigerator for free if it uses too much electricity!
 - **Heating System Services:** Homeowners may receive help paying for heating system repairs, cleanings, and replacement.
 - **Utility Budgets:** Through payment plans, National Grid can help you reduce or eliminate the amount of money you owe on your gas and electric bills.
- **All programs subject to eligibility guidelines** ▪
 - **Call today to check your eligibility and apply!** ▪

Energy-Saving Tips:

Use energy-efficient appliances

Wait until your dishwasher is full to run

Keep an eye on your refrigerator's temperature

Adjust the settings on your water heater

Clean your dryer's lint trap after use

Keep your thermostat at 64-68°F

Have your heating system cleaned annually

Weatherize your home

Use low-energy fluorescent bulbs

Install low-flow shower heads

Keep air-conditioning vents clean
